

ROTATOR PLATES & FABRICATED STEEL BASE PALLET BIN

Many poly pallet bins require the addition of metal components to maximise their usefulness. Orion Australia have a dedicated steel fabrication design and manufacturing service to complement the poly manufacturing process. From simple pressed steel rotator plates to fully fabricated bases and trolleys – simply tell us your requirements!

BENEFITS

Optional rotator plates to allow dumping of bin contents using rotating forklift head. Can be supplied in either galvanized or stainless-steel, based on specific needs for your situation. Varying plates designs are available to cater for multiple applications and equipment, such as forklifts, pallet jacks, castor wheel bases, etc.

SPECIFICATIONS

Capacity **780**
